REAL MANUFACTURER

We are Manufacturer and Re-Manufacturer
Euro 4/5/6 Mufflers

- SCR-PM-DOC coated ceramic and
- Metallic catalysis.
- High heat absorption and compensation
- Capability insulation mats.
- High density "wire mash"
- High life time and high resistance against
- Adblue, austenitic stainless steel shelling.
- %100 direct fit.
- High emission reduction and fuel economy.
- No maintenance.

ABOUT US

HOBIX GROUP

Started 1996 still keep the same MOTTO , produce ,sell , earn , invest for our people and products. We still and more of the same spirit as of 2021 Hobi manufactures around 16.000 parts and still more to come , We are REAL MANUFACTURER

OUR TARGET

Our Vision

To be a well-known and preferred company in the automotive sector.

Our Mission

For automotive and similar sectors • Exhaust systems (pipe, silencer etc.) • Clamp production.

Our Strategy

To enlarge our organization to provide production and assembly capacity for complementary solutions. To employ motivated employees who will adopt the values of the organization and support the cooperation and harmony required to ensure the effective implementation of our processes for continuous improvement.

We provide a complete

With more than 13,000 products available we offer the world's widest product range for on-road transport (LCV, trucks and buses), off-road and construction equipment.

- Diesel Oxidation Catalysts
- Diesel Particle Filters
- Front pipes
- Tail pipes
- Pipe insulation
- Clamps
- Flex pipes and bellows

Sensors OE quality Reliable performance is our main priority.

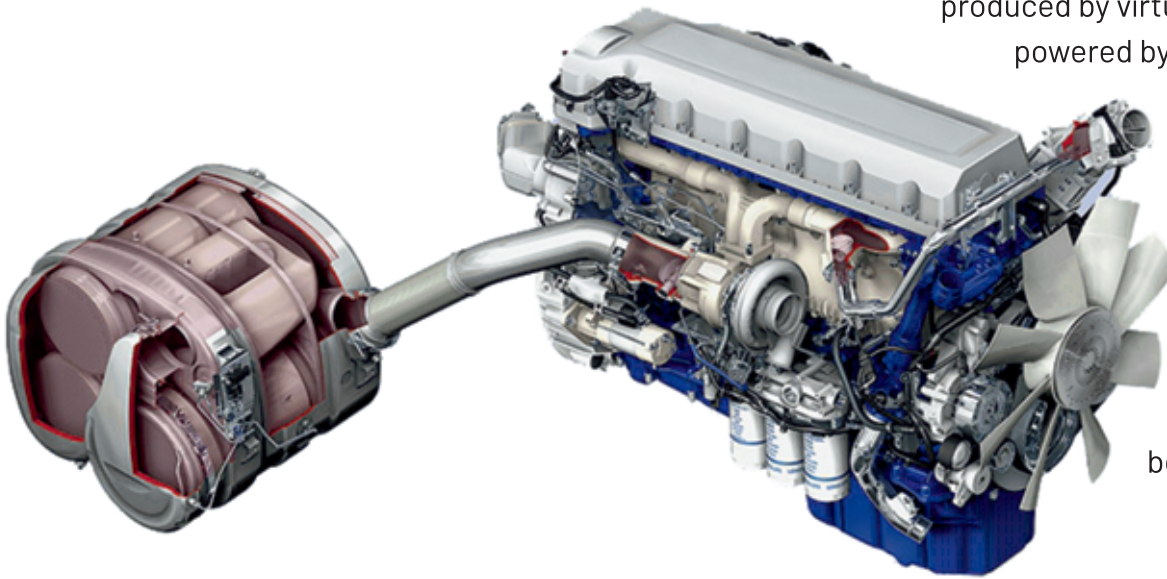

Certified and approved

Our way to ensure optimum quality that equals and in many cases even surpasses original equipment. Certified and approved Probably needless to say, but Hobiex is certified according to a number of international standards, including:

- ISO 9001
- ISO-45001
- ISO-14001
- ISO19001 Certificate
- DIN 76051
- IATF 16949
- ECE-R Certificate

How does a Euro 6 engine work?

It works by storing the nitrogen oxide and then mixing it with exhaust gases to convert it into nitrogen and water. Euro 6 is the name given to a set of limits for harmful exhaust emissions produced by virtually any vehicle powered by petrol or diesel engines - this includes hybrid cars, too, because they also use a petrol or diesel engine under the bonnet alongside their electrical elements.

includes hybrid cars, too, because they also use a petrol or diesel engine under the bonnet alongside their electrical elements.

The Euro VI Standards for Heavy - Duty Vehicles

The Euro VI standards were originally set out in Regulation 595/2009 and its implementing Regulation 582/2011, with further amendments contained in Regulation 133/2014. The Euro VI emission limits went into effect in 2013 for new type approvals and in 2014 for all registrations.

Table 3. The Euro V and Euro VI heavy-duty vehicle emission standards for diesel engines

	Euro V Heavy-Duty		Euro VI Heavy-Duty	
	Euro V SS ^a	Euro V T ^b	Euro VI SS ^a	Euro VI T ^b
Emission limits (g/km)				
CO	1.5	4.0	1.5	4.0
HC	0.46	0.55	0.13	0.16 ^d
CH₄^c		1.1		
NO_x	2.0	2.0	0.4	0.46

Test Cycle	ESC & ELR	ETC	WHSC	WHTC

^aSteady-state testing; ^bTransient testing; ^cFor Euro V for Natural Gas Only, for Euro VI, NG and LPG;

^dTotal HC for diesel engines, non-methane HC for others

What are Euro IV Standards?

Euro VI is the name given to a set of limits for harmful exhaust emissions produced by virtually any vehicle powered by petrol or diesel engines - this includes hybrid cars too, because they also use a petrol or diesel engine under the bonnet alongside their electrical elements.

European standards and require the best technology currently available for vehicle emissions control. Countries outside of Europe, the United States and Japan have largely patterned their emissions policies on European regulations and the associated mandates for clean, low-sulfur fuels. By adopting the Euro 6/VI vehicle emission standards, these countries can achieve up to a 99 percent reduction in the emission of pollutants like fine particulate matter (PM2.5), reducing the risk of ischemic heart disease, lung cancer, stroke, and asthma.

FOR BEST FUTURE We Continue to produce more environmentally friendly products

Euro VI System Product Content

Flexible Pipes and Belows
SS Flexible pipes starting from 45mm and all types of below.

Emission Units
DOC (Diesel Oxidation Catalyst)
SCR (Selective Catalytic Reduction)
DPF (Diesel Particulate Filter)

Sensors
Best quality and guaranteed NOx and Temperature sensors units.

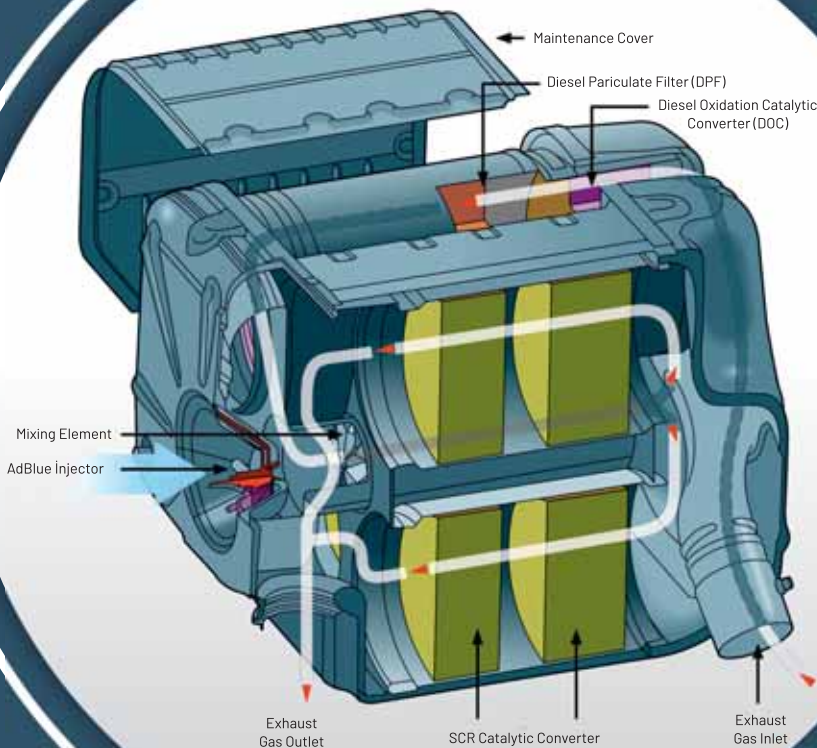

Slincers Materials
We can supply aluminized or stainless steel quality.

Integral Insulation
Mainly used in systems with emission regulations to protect the outside from the heat and to keep the heat inside for better performance of muffler.

EURO VI SYSTEM FOR COMMERCIAL VEHICLES

Pipes
Blending from 10 mm to 152.4mm in aluor stainless steel front pipes tail pipes

Clamps
Flat clamps, DIN clamps, V-clamps, Flex clamps and U-Clamps.

The Exhaust System Evolution

Simplified chart showing the progression of European emission standards for Diesel cars.

Simplified chart showing the progression of European emission standards for Petrol cars.

Note that until Euro 5, there were no PM limits.

European emission standards define the acceptable limits for exhaust emissions of new vehicles sold in the European Union and EEA member states. The emission standards are defined in a series of European Union directives staging the progressive introduction of increasingly stringent standards.

The final standard is Euro 7, which will be followed by phase-out of fossil fuel vehicles.

1. Background

2. Toxic emission: stages and legal framework

- Emission standards for passenger cars
- Emission standards for light commercial vehicles
- Emission standards for trucks and buses
- Emission standards for large goods vehicles
- Enhanced environmentally friendly vehicle
- Emission standards for non-road mobile machinery

3. Emission test cycle

- Light duty vehicles
- Heavy duty vehicles
- Cycle beating" controversy

4. Co2emissions

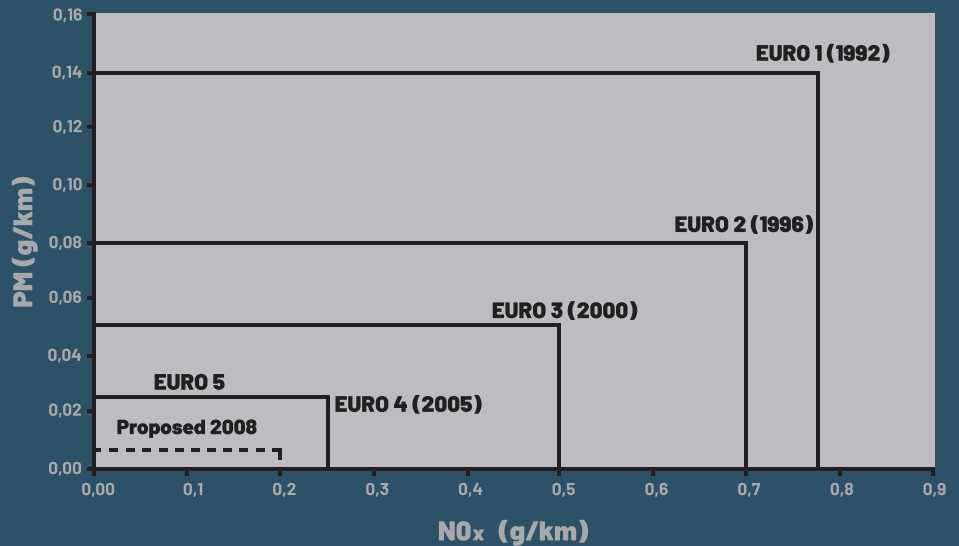

- Obligatory labelling
- Obligatory vehicle CO2emission limits
- Electrification

NOx and PM emission standards for diesel cars

NOx and PM emission standards for petrol cars

The legal framework consists in a series of directives, each amendments to the 1970 Directive 70/220/EEC. The following is a summary list of the standards, when they come into force, what they apply to, and which EU directives provide the definition of the standard.

Euro 1(1992):

For passenger cars—91/441/EEC.

Also for passenger cars and light lorries—93/59/EEC.

Euro 2 (1996) for passenger cars—94/12/EC (& 96/69/EC)

For motorcycle—2002/51/EC (row A)—2006/120/EC

Euro 3 (2000) for any vehicle—98/69/EC

For motorcycle—2002/51/EC (row B)—2006/120/EC

Euro 4 (2005) for any vehicle—98/69/EC (& 2002/80/EC)

Euro 5 (2009) for light passenger and commercial vehicles—715/2007/EC[

Euro 6 (2014) for light passenger and commercial vehicles—459/2012/EC[and 2016/646/EU

Euro 7 (2025)

These limits supersede the original directive on emission limits 70/220/EEC.

Why Partner with Hobi ?

Providing tools and support

Products

Competitively priced Hobi DPF's (new and reconditioned), DOC's, SCR's, bellows and pipe treatment systems. Our portfolio also includes NOx and Temperature Sensors.

Quality: All Hobi parts are best quality, and are a direct-fit installation out of the box. Each unit is quality tested prior to packaging.

Warranty: 1 years for aftertreatment systems (DPFs, DOCs, SCR's), pipe treatment systems, 6 month for reconditioned DPFs and 1 year on accessories, electronic equipment (NOx and Temperature Sensors), bellows and flex.

Catalogues

Hobi offers the most user friendly, interactive and comprehensive catalogues for exhaust spare parts in the aftermarket industry. The catalogues are available in print and online versions with flip function and direct integration into the Hobiex B2B Portal

Web Shop

B2B Portal is the future-oriented information and eCommerce procurement platform from Hobiex . It provides efficient access to the comprehensive supply of more than 16000 automotive parts and accessories of the product Hobiex Automotive.

The Partner Portal is being continuously further developed in order to provide distribution partners with the best possible service for the daily procurement of spare parts.

Sales & Support

We support our customers 24/7 online from whatsapp on website.

Our customers can get all needed information by mail or phone.

Why Hobi for your Customers?

Warranty

1 years for aftertreatment systems (DPFs, DOCs, SCR), pipe treatment systems, 6 month for reman DPFs and 1 year on accessories, electronic equipment (Nox and Temperature Sensors), bellows and flex.

The Same of

Hobi DPFs, DOCs, SCR, and pipe treatment system kits are exact fit to OE, saving your time in the shop.

Reman Program

The Hobi reman DPF is a relevant alternative to new DPFs. The DPFs are cleaned in a 3 step cleaning according to OE approved methods to secure optimal functionality. The kits include needed clamps and gaskets.

Clamps and Gaskets Included

Clamps and gaskets are included in all DPF, DOC and SCR kits, saving you time and ensures customers receive the right parts for the right repairs.

Flex & Bellows Program

Hobi flex & bellows decouple engine torque and heat expansion for a better regeneration. Bellows 2S+ and 3S flex come in multiple dimensions and lengths to fit your needs.

Pipe Treatment Systems

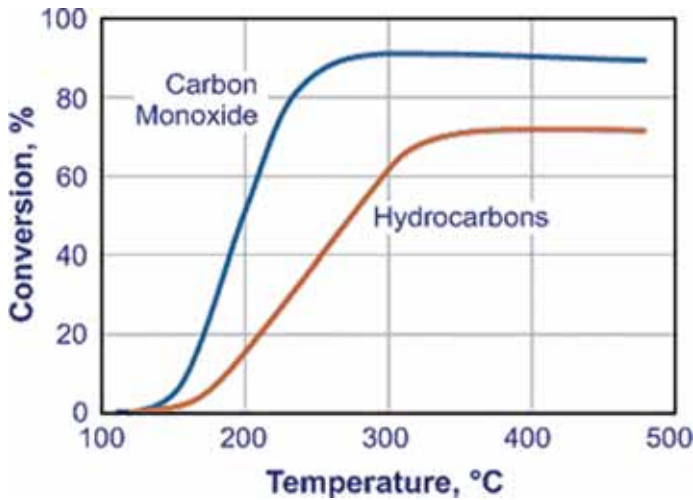

Hobi develops and manufactures complete pipe treatment systems having decades of experience and know-how, which enable us to offer cost-efficient solutions of the highest quality.

Sensors

The Sensor program include NOx and temperature sensors for direct replacement of the OE units. The NOx sensor ensures accurate AdBlue dosing, and the temperature sensor measures the temperature to monitor the operation conditions of the aftertreatment components.

How does diesel oxidation catalyst work?

Diesel Oxidation Catalysts, also known as DOCs, are **exhaust aftertreatment devices that reduce emissions from diesel fueled vehicles and equipment.** Engine manufacturers have used DOCs in different in-use.

Abstract: Diesel oxidation catalysts promote chemical oxidation of CO and HC as well as the organic fraction (OF) of diesel particulates. They also oxidize sulfur dioxide which is present in diesel exhaust from the combustion of sulfur containing fuels.

Can you clean a diesel oxidation catalyst?

In general, cleaning requires removing the DOC from the vehicle, heating it, and using compressed air combined with a vacuum system to blow out the ash and capture it in a sealed container. Hobiex is doing this cleaning service professionally.

SCR

How does Selective Catalytic Reduction Work?

Selective Catalytic Reduction (SCR) is a proven and advanced active emissions control technology system that **injects a liquid-reductant agent through a special catalyst into the exhaust stream of a diesel engine.** ... The DEF can be rapidly broken down to produce the oxidizing ammonia in the exhaust stream

What is the catalyst used in SCR?

SCR catalysts are made from various porous ceramic materials used as a support, such as **titanium oxide**, and active catalytic components are usually either oxides of base metals (such as vanadium, molybdenum and tungsten), zeolites, or various precious metals.

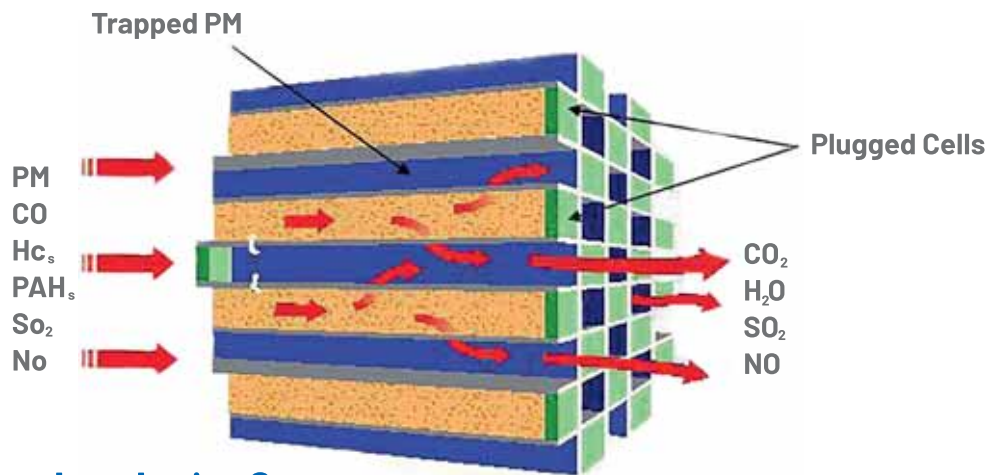

Diesel Particulate Filter

A **diesel particulate filter**, or DPF, is an exhaust aftertreatment device that traps particulate matter such as soot and ash. A DPF typically uses a substrate made of a ceramic material that is formed into a honeycomb structure.

How does DPF work?

A DPF is designed to control emissions **by trapping the particulate matter within a filter**. ... The particulate filter removes soot particles from the exhaust by passing the exhaust gases through a ceramic wall flow filter. Solid soot particles are then trapped on or in the ceramic filter wall

How often does DPF need replacing?

How long should a DPF last? A DPF can last up to around 100,000 miles if maintained properly. After the car has exceeded that mileage, you could be looking at paying a large amount of money for a replacement - so always properly check MoT and service records when buying a used car.

What are the signs of a blocked DPF?

The main and most obvious sign that you have a problem with the filter system will be that the DPF warning light will illuminate on your dashboard, to warn you that it will need regenerating, in order to clear itself. If the DPF light is accompanied by the engine management light, the situation may have already progressed to a more serious problem and it will need to be diagnosed on a diagnostic scanner.

Here are some other signs to look out for when dealing with a DPF Problem:

- You feel a loss of power in your engine (limp mode).
- The DPF light will appear on your dashboard.
- Passive and active regeneration keep failing.
- A pungent smell of diesel.
- Automatic Stop-Start System Not Working
- Your car seems to be releasing an excessive amount of smoke.
- An Increase in the oil level.
- You've noticed an increase in fuel consumption.
- If the scenario occurs where both passive and active regeneration fails, another light may pop up on your dashboard, to alert you to this fact and in that case, you may require our specialist DPF cleaning services.

CONTENT

ATS solution comprising cordierite or high porosity silicon carbide DPF with optimal PGM loading for soot-free emissions and cordierite DOC and SCR for the highest catalytic efficiency. Coupled with Hobi bellow and insulation technologies, perfect for OE replacement. ATS silencer consists of two sections with DOC and DPF and the section with SCR. Hobi also offers all exhaust pipes and other parts related to exhaust systems for DAF trucks.

MAN

CONTENT

A very compact and lightweight one-box ATS system. Designed for easy maintenance, this one-box solution combines ATS efficiency together with easily replaceable DPF unit. The result is smooth, prolonged operation with emission reduction that matches OE level. All parts are from stainless steel to ensure lifetime of exhaust system. Hobi also offers all exhaust pipes and other parts related to exhaust system for MAN trucks.

MERCEDES

CONTENT

A truly unique ATS solution comprising a replaceable, high quality silicon-carbide DPF for more soot capacity with a PGM loading on the same level as OE and DOC and SCR for the highest NOx reduction. Silicon - carbide DPF gives a more durable, effective DPF solution. Hobi also offers wide range of exhaust pipes and other parts related to exhaust systems for Mercedes trucks.

RENAULT

CONTENT

Very high quality ATS unit comprising replaceable cordierite DPF with PGM loading on the same level as OE to secure complete system functionality. The DOC, DPF and SCR all function together as precision tuned instruments for the highest of emission standards. Direct replacement for OE unit. Hobi also offers all exhaust pipes and other parts related to exhaust system for Renault trucks.

SCANIA

CONTENT

The only ATS unit with both – easily replaceable DPF and DOC without any cutting or welding for the most longevity. The flex-pipes are made from high quality stainless steel, wound and tested to the highest detail contributing to the benefits of replaceable substrates. Direct replacement for OE unit. Hobi also offers all exhaust pipes and other parts related to exhaust system for Scania trucks.

VOLVO

CONTENT

Well-designed one-box solution with the same PGM loading as OE to secure complete system functionality. This system uses cordierite DOC, DPF and SCR. DPF is easily replaceable and more affordable. Combined with the advanced DOC, SCR and high-quality insulation technologies, the emission levels are on par with that of OE. Hobi also offers all exhaust pipes and other parts related to exhaust system for Volvo trucks.
